## **Bio**

James Sayer is a distinguished professional in the field of Claims Management, bringing a wealth of experience and expertise to the table. With a strong academic background, including a BA in Business Management from the University of Northumbria, James has carved out a significant niche in the engineering and construction industries. His career spans a variety of major projects, from high-rise buildings to hospitality, retail, entertainment, and residential developments.

James has a proven track record in the preparation and defence of claims for time and money on complex projects. His deep understanding of site-based claim management procedures, from project inception to close-out, ensures that claims are managed effectively and efficiently. He is well-versed in contracts and claims procedures, making him an invaluable asset in the construction sector.

James is responsible for managing claims and consistently works with top-tier contractors. His strategic approach to claim management focuses on timely resolution and risk minimisation, while maintaining positive relationships with project stakeholders, including owners, contractors, and subcontractors. James's expertise and dedication make him a leading figure in the field of Claims Management.
