Bio

Geoff Grant is a distinguished Chartered Engineer and Technical Expert Witness with over 30 years of experience across the construction, engineering, petrochemical, power, communications technology, rail, and infrastructure sectors. He has delivered expert witness, adjudication, and commercial consultancy services throughout the UK, Europe, Africa, and the Gulf States.

Geoff has acted as Adjudicator on numerous disputes under NEC contracts and bespoke contractual arrangements, earning a reputation for delivering clear, concise, and well-reasoned decisions. His expertise includes claims management, dispute resolution, delays and disruption analysis, valuation assessments, adjudication, mediation advice, and commercial consultancy services.

Throughout his career, Geoff has advised clients on major projects including Crossrail, Highways England schemes, nuclear infrastructure, petrochemical facilities, power generation plants, data centres, commercial developments, retail projects, utilities infrastructure, and luxury residential developments. His extensive knowledge of NEC, FIDIC, and JCT contracts, combined with his experience as a regular contributor to the NEC Reachback Forum and mentor within the construction industry, has established him as a trusted advisor on complex commercial and contractual matters.
