Bio

An aspiring Quantity Surveyor currently undertaking a Degree Apprenticeship in Quantity Surveying, gaining practical experience alongside academic study. Has developed strong foundational knowledge in cost management, estimating and commercial processes within the construction industry.

Experience includes supporting commercial teams on large-scale railway infrastructure projects, assisting with cost management, variations and financial reporting across multiple project stages. Demonstrates strong analytical and organisational skills, with ability to contribute to weekly cost reporting, CVRs and progress tracking.

Proficient in a range of industry software including Excel, Bluebeam, Primavera and MS Project with additional strengths in communication and stakeholder support. Brings a proactive approach to learning and development, alongside experience in customer-facing roles and team environment.
