## Bio

Paul is a respected commercial and claims management specialist with more than four decades of experience across major infrastructure and transportation projects. His expertise spans commercial management, contract administration, dispute resolution, delay analysis, and quantum assessment on complex rail, metro, heavy civil, and infrastructure schemes.

Throughout his career, Paul has held senior commercial and leadership positions with Tier One contractors and consultants, delivering high-profile projects across the UK, Middle East, and Europe. His experience includes the Doha Metro Gold Line, King Abdullah Financial District Light Railway, Riyadh Metro, Stansted Airport Transformation Programme, and major industrial infrastructure projects.

Paul is recognised for providing strategic commercial advice, managing complex contractual disputes, preparing extension of time and disruption claims, and supporting arbitration and dispute resolution proceedings. His practical experience in risk management, procurement, contract administration, and project controls has established him as a trusted advisor on high-value infrastructure projects.
