Bio

Allon Hill is a highly distinguished Construction Manager with over 30 years of comprehensive experience in the construction and civil engineering sectors. Throughout his career, Hill has showcased his expertise in project management, commercial management, and contract negotiation across a wide range of projects, including educational facilities, new build constructions, and modern construction techniques. His proficiency in spearheading projects from their inception through to completion has established him as a key player in the industry.

Allon's career trajectory includes significant roles such as the Construction Manager at Wates Construction, where he was instrumental in delivering refurbishment works for several schools in Borehamwood, UK, and leading new build construction works for education authorities. His responsibilities extended to consulting with funding parties, school governors, and local authority personnel on key development requirements. At Cape Durasteel Fire Protection Engineers, Hill gained valuable experience in industrial placements, contributing to major projects like the Jubilee Line Rail Extension project in London.

Renowned for his ability to manage complex projects, Allon's professional journey is marked by his dedication to ensuring projects are completed to the highest standards, within budget, and on schedule. His work ethos, combined with his ability to engage effectively with stakeholders, subcontractors, and team members, has cemented his reputation as a leading professional in the construction management field.
