- Quality Assurance and Compliance
- Budget Management and Cost Control
- Logistical Coordination
- Inspection and Test Plans (ITPs) and Method Statements
- Multidisciplinary Team Leadership
- Digital Construction Tools: BIM, AutoCAD, and MS Project

## Bio

Roberto has extensive experience managing complex construction projects, focusing on coordinating design and construction activities, managing temporary works and dewatering operations, and leading multidisciplinary teams across various regions. His expertise in risk assessment and quality management ensures seamless project delivery.

Over his career, Roberto has worked on diverse projects, including tunnelling, metro construction, renewable energy developments, and residential and commercial builds. His commitment to continuous improvement is evident in his proactive approach to safety and compliance, as well as his ability to foster collaboration among multicultural teams. He also leverages his technical knowledge to prepare Bills of Quantities and support claims preparation.

Roberto's dedication to professional growth and sustainable practices is reflected in his ongoing MBA studies and specialisation in renewable energy optimisation. His leadership and technical expertise make him a valuable asset in delivering complex construction projects to exacting standards.
