- Defence Projects
- Data Centre Construction
- Programme Management
- Operational Leadership
- Commercial Management
- Procurement & Supply Chain Management
- Testing & Commissioning
- Energisation Planning
- Stakeholder Management
- Profit & Loss Responsibility
- Strategic Business Growth

Bio

Peter is an accomplished electrical and MEP leader with more than 40 years of experience delivering major infrastructure, rail, defence, nuclear, and mission-critical projects throughout the UK. His career has progressed from electrical engineering and project management roles into senior operational and director-level positions, leading large multidisciplinary teams and managing complex engineering programmes.

Throughout his career, Peter has held senior leadership roles with organisations including MPG Quantity Surveyors, Costain, NG Bailey, SPIE Matthew Hall, Lorne Stewart, Drake & Scull Engineering, Boulting Group, and regional electricity boards. He has been responsible for the successful delivery of major projects including Crossrail, Bakerloo Line Link, Tottenham Court Road Station Upgrade, Reading Station, London Bridge Station, St Pancras International, Canary Wharf Station, and numerous power, industrial, and transportation schemes.

More recently, Peter has expanded his expertise into defence, nuclear, and data centre sectors, leading projects for Rolls Royce, Sellafield, Sizewell Power Station, Barclays, and Credit Suisse. His experience includes managing high-value M&E packages, overseeing testing and commissioning activities, energisation planning, commercial performance, procurement, subcontractor management, and stakeholder engagement.

Peter's combination of technical expertise, commercial acumen, and operational leadership has enabled him to consistently deliver successful outcomes on complex, high-value engineering projects, establishing him as a respected leader within the rail, infrastructure, defence, and nuclear sectors.
